MERYDYAN PRYME POWERED BY AMERICANCHECKED

NATIVE BUILT.
TRIBAL FOCUSED.

WHO WE ARE.

Merydyan Technologies and AmericanChecked Inc. are Native-owned companies with decades of experience in serving the Tribal gaming industry. With Merydyan's dynamic workforce management system integrated with AmericanChecked's background screening platform and TribalTRAC - the only product on the market specifically built for gaming commissions to verify employment and licensing history of employees and vendors - we've developed an all-in-one platform that is flexible to meet your unique needs.
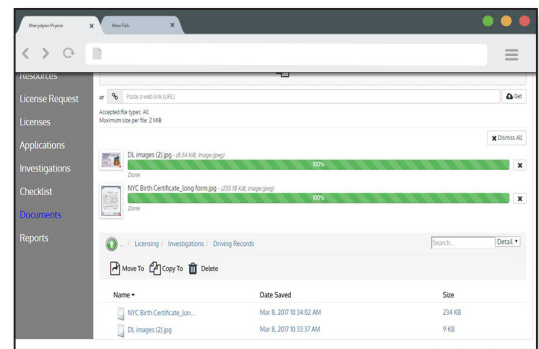

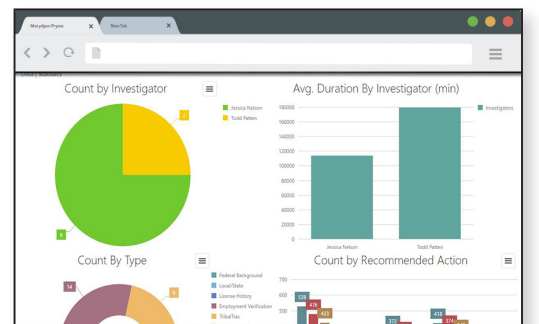

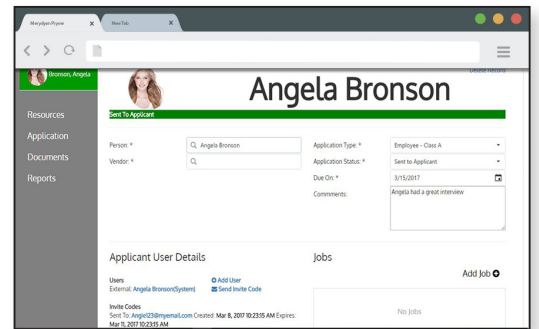

WHAT WE DO.

In short: Our products and integration make your life easier by making your job more efficient.

Both AmericanChecked and Merydyan place a premium on providing quality products and service that allow our clients to make well-informed decisions, with accuracy and fast turnaround times.

DO MORE IN LESS TIME.

By integrating two high caliber, complementary systems, we are able to provide a powerful, seamless solution for employee licensing and background screening that allows for all the information to be found in one place.

From applications, to onboarding, to background screening, to fingerprinting, to licensing and verification, our integration has everything you need for the life cycle of your employees all in one place.

MORE THAN JUST A PRETTY INTERFACE

Many of our competitors say they integrate with other providers, when they really only interface. While the terms may sound similar, they are worlds apart in implementation and user experience.

An interface only provides a bridge for the transfer of information. It still maintains two separate systems that require constant upkeep to ensure the data is correctly mapped from one system to another. Integration is where two systems become one, like interlocking puzzle pieces, sharing data in real time.

Merydyan *Pryme* integrates directly into AmericanChecked's background screening platform as well as TribalTRAC, meaning we are truly a one-stop-shop.
