

THE **AMERICANCHECKED** DIFFERENCE

PROVEN INDUSTRY EXPERIENCE YOU CAN COUNT ON

In the background screening industry, national accreditation by the Professional Background Screening Association (PBSA) is the gold standard. AmericanChecked was one of the first companies to achieve accreditation and ranks among the top 3% of background screening companies in the nation.

Founded in 2005 by former “Big 3” executives and security specialists with nearly 100 years of combined screening experience, AmericanChecked has the experience and expertise to provide you with superior products and services.

Our clients count on us for efficient, paperless employee background screening solutions. In addition, each employee has earned FCRA certification – the standard for knowledge and compliance in the background screening industry. We offer peace-of-mind security with data centers located in two states. At AmericanChecked, we continuously review, update, automate and work smarter to meet and exceed your goals. We are strategically built to innovate quickly and precisely, delivering solutions with agility.

IMPACTING CHANGE IN THE INDUSTRY

For years, AmericanChecked recognized that there was a deficiency in the laws in the state of Nevada that prevented background screeners from reporting all convictions past seven years, including violent offenses and theft. AmericanChecked introduced Senate Bill 409 in partnership with Tony Cabot at Lewis Roca Rothgerber and sponsored by former Nevada Gaming Control Board Chairman and State Senator Mark Lipparelli that changed the landscape of what is now reportable in Nevada for the whole industry. With the passage of SB409, businesses, their employees and their patrons enjoy greater protections as CRA’s are now able to report criminal convictions older than 7 years to all employers and reporting information to gaming licensees about a job applicant regarding bankruptcies older than 10 years and other civil judgments older than 7 years.
